

iKeepSafe™

PEACE OF MIND FOR FAMILIES ONLINE

What We Know

- According to the National Initiative for Cybersecurity Education (NICE) Strategic Plan, “our nation is at risk” and “now is the time to begin a coordinated national initiative focused on cybersecurity awareness, education, training, and professional development.”
- educators feel ill-prepared and uncomfortable addressing cyber safety, security and ethics in the classroom
- 91% of parents say that they want more information on Internet safety. A 2011 study by EU Kids Online found that “many parents want far more information on internet safety than they actually get from the child’s school, from government or local authorities, ...”

Generation Safe tools include:

- Award-winning school self-assessment,
- Multimedia-driven professional development
- Comprehensive incident response tool and flowchart
- Specialized digital citizenship and social-norming guidance

Students and educators:

- **Weekly curricula** for students connected to current events and media stories
- **Weekly professional development**
- **Weekly message to parents**

Parents and consumers:

Weekly content to broadcasters that includes:

- Short sample script
- Key points
- Links to news articles referenced
- Relevant statistics

Development

Welcome to Generation Safe™. As a school administrator, you set the tone for school climate that shapes the character and quality of school life. School climate determines what sort of behaviors, interactions, and challenges are likely to arise in the school. Generation Safe™ is specifically designed to help you secure the safety of your students and faculty while limiting any exposure that might come to the school through a cyberincident.

Today's technologies offer tremendous educational and community-building potential. They also pave the way for new challenges to children

ADMIN REPORTING

WELCOME TO GENERATION SAFE™ 360 SELF ASSESSMENT

The review tool brought to you by iKeepSafe Generation Safe™ and powered by 360 Safe.

The Generation Safe™ 360 Self Assessment online tool provides a user friendly and interactive means for schools to review their digital citizenship practices and to develop an action plan to bring about improvements.

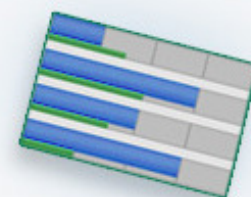

An overview of Generation Safe™ 360 Self Assessment

Provides schools with an opportunity to review its digital citizenship policies and practice and bring about necessary improvements. This tool can be used in conjunction with the school's e-safety policy... [More information](#)

How can I achieve Generation Safe™ 360 Accreditation?

The Generation Safe Gold Medal is currently being offered to a small sample of schools as part of a pilot program. To gain the award, schools will need to complete the Generation Safe™ 360 Self Assessment and meet... [More information](#)

ABOUT THE INCIDENT RESPONSE TOOL

The Generation Safe™ Incident Response Tool (IRT) is a robust, interactive program that will guide school administrators through the resolution of any cyber incident (those involving digital information and technology). The flowchart and investigation tools ensure the best possible outcome for victims, offenders, and bystanders as well as limit exposure to the school and staff.

Flowchart

Incident Response Tool Flowchart

The IRT flowchart shows each step in the resolution of an incident. It indicates when to involve the primary stakeholders, when to bring in law enforcement, and how to conduct follow up after the incident is resolved. The flowchart will give administrators confidence that their actions are appropriate and responsive to the situation.

[Go >](#)

Investigate an Incident

Incident Investigation Forms

Based on your input, the IRT will produce a customized investigation plan to ensure the best possible outcome for victims, offenders, and bystanders. The plan guides administrators through the investigation process with custom investigation forms and recommendations from law enforcement, public health and well-being experts.

[Go >](#)

Learning Modules

Incident Response Information

The IRT Learning Modules cover essential information for ensuring the best resolution of an incident. Created under the guidance of leading legal and law enforcement experts, the Learning Modules explain how to: prepare for an incident, conduct a thorough investigation, and carry out the "reasonable" search of a cell phone.

Flowchart Tools

Tier 1

Not highly inflammatory. Generally the incident can be solved in-house or with minimal involvement from outside help.

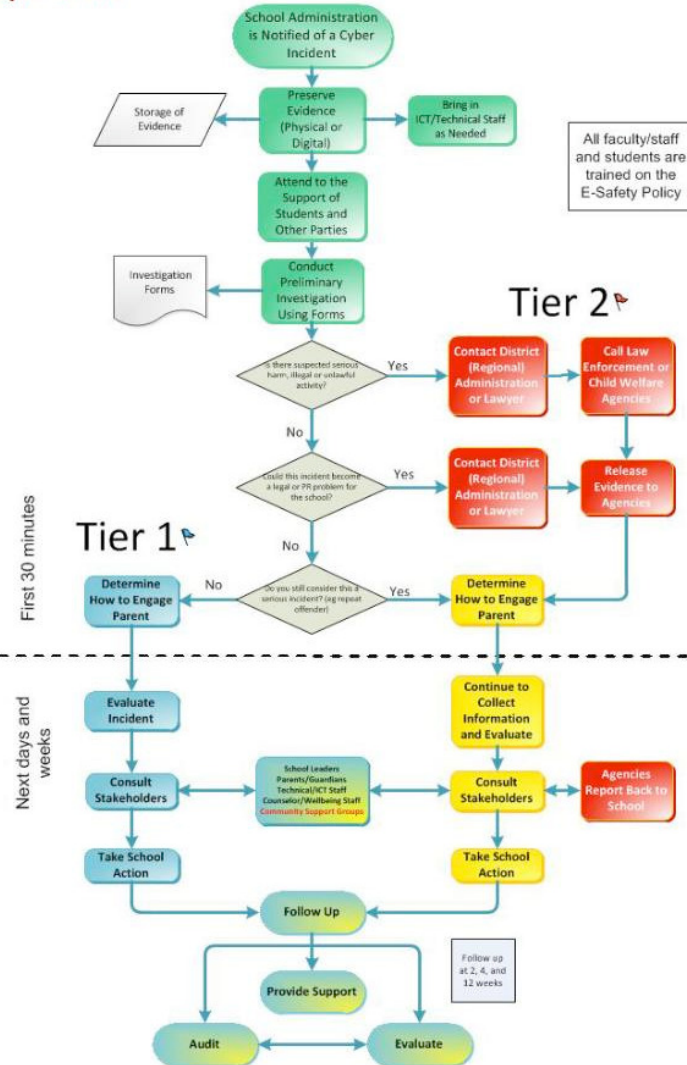

Tier 2

Is a student or staff in danger of injury? Could this incident become a legal problem for the school? Is the issue highly emotional with the potential to create a PR problem? Is the incident serious (eg repeat offender)?

RELATED SCENARIO INFORMATION

Teacher "friends" student and makes inappropriate comments to student and other kids see comments

Actions for Administrators:

Preserve evidence (physical or digital).
Attend to the support of students and other parties.
Conduct preliminary investigation.
Determine whether to call law enforcement.
If school property was u... [More >](#)

What to Expect From Law Enforcement:

This is not a law enforcement issue and the Student Resource Officer would be acting in the capacity of a school administrator if he/she responded to this incident. [More >](#)

When Interviewing the Victim:

Consult with the student and parents and take precautions to ensure that the student feels safe and is not retaliated against by the teacher.

South Mountain High School

Incident Type: Inappropriate contact with staff (boundary invasion)

Criminality: Illegal or unlawful with possible criminal/civil charges of sexual harassment **or** stalking **or** statutory rape

Victim Questions

- What happened?
- Who is involved?
- What was the nature of the comments (eg intimidation, sexual, school life, personal life)?
- What, if any, role did you play in the incident?
- When did the incident get noticed?
- How did you become aware of the posting?
- On what website/forum did the incident occur?
- Where did the incident occur? [On or off campus]
- Was school property used, such as a school laptop or network connection?
- What forum was the comment posted on?
- Who knows about this incident?
- Who saw the post?
- Who has access to the material?
